

SMART ROASTER SERIES

LILLA
No one else

BE SMART

THAT'S WHAT LILLA SAYS, FOR YOU THAT NEED QUALITY.

The Smart roaster series, converts EXCELLENT cupping results, through its unique Convection Roasting System (only hot air required for roasting). In a very compact system, the SMART allies roasting quality to roasting efficiency.

LIKE ALL LILLA'S ROASTERS SERIES, THE SMART, HAS IN ITS FEATURES IMPORTANT ADVANTAGES:

- CONVECTION ROASTING SYSTEM (BEST SYSTEM AVAILABE IN THE MARKET)
- EXCLUSIVE B.B. SYSTEM (ABLE TO ROAST A WIDE VARIETY OF BEANS, EVEN BROKEN BEANS)
- BUILT IN AFTER BURNER - SMOKELESS AND ODORLESS OPERATION (NO NEED TO USE AFTER BURNER)
- WATER QUENCHING SYSTEM
- VERY EFFECTIVE PROFILE ROASTING
- ROBUSTNESS
- VERY LOW MAINTENANCE COST, DUE ITS UNIQUE FABRICATION CONCEPT
- ONLY INTERNATIONAL BRAND COMPONENTS
- EXTENDED ROASTER LIFETIME

CONVECTION ROASTING SYSTEM

The Best roasting system available in the market, is what this roaster can offer to you. Roasting the beans only by hot air, this roaster can for sure, supply an overwhelming quality.

EXCLUSIVE B.B. SYSTEM

Lilla converts the best roasting quality and efficiency to the customer.

What do you need to roast?

Large or small broken beans?

The SMART series is able to handle a wide range of different raw materials including small broken beans, avoiding any leakage.

Many customers nowadays seek for this feature, and The Smart Series can provide it.

BUILT IN AFTER BURNER

Applied in all Lilla´s roasters, this system consists in using only 1 burner. The need to have an after burner, is not necessary to any of Lilla´s roasters for almost 30 years. This allows you to save fuel, and also save costs for maintenance, as you need to maintain 1 burner only.

WATER QUENCHING SYSTEM

In order to cool down the roasted beans in a quicker way, Lilla´s roasters offer the possibility to do it, by applying water into the beans inside the drum, making the process quicker.

VERY EFFECTIVE PROFILE ROASTING

The Smart series has a very flexible profile roasting, providing very good roasting possibilities.

ROBUSTNESS

This is a feature, that LILLA applies to all its roasters, The Smart Series are compact roaster and very robust.

You can see this, in the chart in this brochure, where mentions weights of all roaster sizes.

EXCLUSIVE AIR PATH SYSTEM

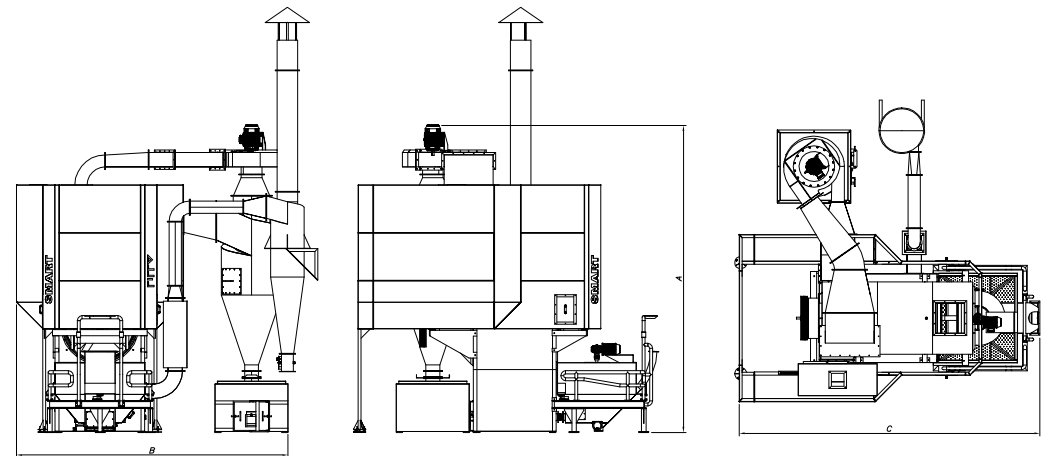

Lilla once again, developing new concepts, came up with a total brand new engineering for this series.

Doing the unthinkable, Lilla placed the heater furnace, over the roasting body, this way shortening the air path into the system.

This exceptional and intelligent concept, makes the air path very short, converting this way, lower energy consumption, and lower maintenance costs, and very compact, being also good for the companies who have space limitations.

EXTENDED ROASTER LIFETIME

In this series of roaster, customers can easily have a product with 40 years lifetime.

MODEL	HOURLY PRODUCTION (KILOS)	HEIGHT A (mm)	LENGTH B (mm)	WIDTH C (mm)	NET WEIGHT
500	500	4385	4143	4131	5000
1000	1000	5056	4480	4872	7500
2000	2000	6105	5465	4693	9000

OPTIONAL:
PRE HEATING SYSTEM, WHICH INCREASES 25% THE HOURLY PRODUCTION
